

6" Clean Swab with IPA Solution

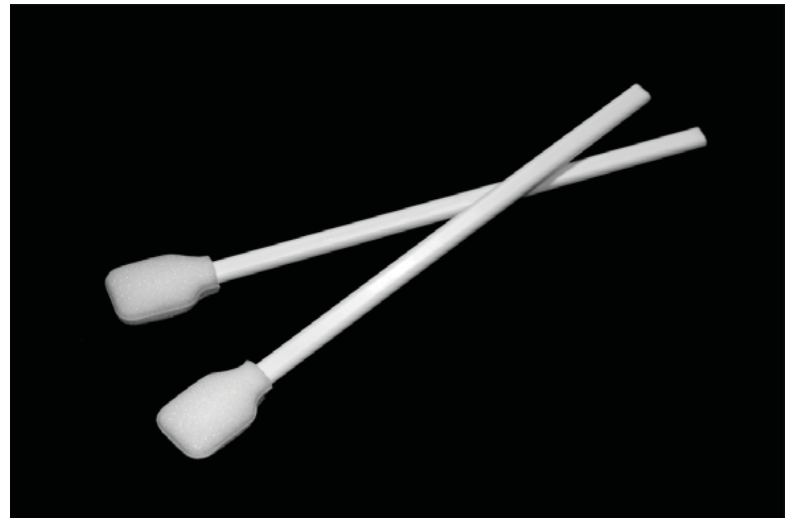

K2-S6T50

This product, saturated with IPA Solution, removes dirt and debris from thermal print heads. When used it will:

- Clean the print head, transport belts and rollers within a thermal printer
- Extend the life of the print head and maintain a readable image

Use as:

- A scheduled maintenance product to prevent equipment failures
- An emergency maintenance product during equipment failures

How Cleaning Products Work

Transaction devices, such as card readers and thermal printers, need to be maintained for performance reliability. Cleaning products safely and easily remove dirt and other contaminants from within these devices without costly outside assistance. Each transaction device requires specific cleaning products to be used as preventive or corrective maintenance.
