**1** Turn off printer, open, and remove media roll

**2** Slide pen tip back and forth across printhead to clean

**3** If needed, Use scraper cap to remove stubborn buildup

**4** Replace media roll, close, and return to back service

## How it Works

Our **Thermal Printer Cleaning Pen with Scraper Cap** is designed to safely remove buildup from the thermal printhead. This reusable product is filled with an ultra-pure, fast-drying electronic Isopropyl Alcohol formula, includes a scraper cap to help remove stubborn buildup and a soft pen tip for gentle and precision contamination removal.

## Recommended Use

Routine cleaning is recommended with every media roll change to successfully maintain device performance. More frequent cleanings may be required for high use devices and/or devices prone to heavy grease, grime and/or environmental buildup.
