

WAFFLETECHNOLOGY®

EMV Card Reader Interior

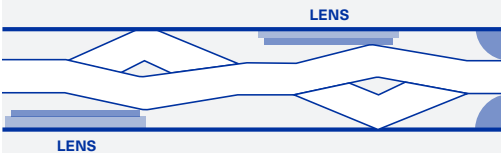

Waffles provide 4x the contact area on rounded components such as EMV pins

Thermal Printer Interior

The added traction from the waffles turns the platen roller to provide added pressure and clean the print heads

Check Scanner Interior

KICTeam's check scanner cards are patterned to match each OEM device so that the waffles compress and expand to clean in the right areas

The leader in cleaning card technology

Our patented Waffletechnology uses raised and lowered waffles which compress and expand to clean recessed areas and around irregular surfaces where flat cards don't reach.

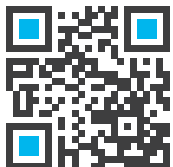

BENEFITS

- Waffles are custom designed to match the placement of key components within a device
- Waffle height, flexibility, shape, and texture are controlled to meet the specifications of each area
- Waffles generate up to 4 times the contact area on irregular surfaces

APPLICATIONS

- Card Readers
- Check Scanners
- Thermal Printers
- Currency Counters
- MICR/Check Readers
- Bill Acceptors

Discover the Benefits of Cleaning

“The three-dimensional ‘waffle’ design on the new cards makes sure that it is in contact with all the necessary internal parts, and cleans the lens thoroughly without damaging it in any way”

Rick Ooten,
Director of Product Management
