**Panini Introduces New and Improved Vision neXt Cleaning Card**

*The same proven effectiveness, now with even better surface compatibility*

Panini's launch of the Vision neXt check scanner moved the market beyond check capture, helping transform the way banks interact with their clients. By avoiding additional devices such as check jogger, ID card scanner, and thermal printer, the Vision neXt can claim a role as the most innovative and highest performing scanner in the market.

In line with their commitment to provide the highest possible performance and customer experience, Panini have been working with cleaning experts KICTeam to launch a cleaning program designed specifically for Vision neXt. The result is a cleaning card that if used regularly will both enhance the performance and prolong the life of the scanner.

Bart McMannon Channel and Product Marketing Manager at Panini stated "We are devoted to ensuring the optimal customer experience for both the teller and their customers. Weekly cleaning with this new cleaning card will minimize piggybacks, ensure image quality, and extend the life of the scanner."

McMannon went on to explain that the use of unauthorized cleaning products has actually been shown to deliver insufficient cleaning results and can even damage a scanner.

Jimmy Timmins of KICTeam commented "We are proud to have worked with Panini on this project. The new card utilizes our patented WaffleTechnology™ to reach the unique contours of Vision neXt and our proprietary cleaning agent WonderSolvent™ which has been developed to cater for the unique debris created from checks."

The new Cleaning Card is available from both KICTeam, Panini and their respective Distributors.

**About Panini**

Founded in Turin, Italy, Panini has enabled clients to capitalize on shifts in the global payments processing market for seventy years. Panini has a rich history of technology innovation, leveraging the company's expertise in research & development. Panini's market leading solutions are based on state-of-the-art engineering resources and ISO-9001 quality certified production. Panini offers check capture solutions that enable customers to fully realize the advantages and efficiencies available with the digital transformation of the paper check, resulting in the world's largest deployed base of check capture systems, now approaching one million devices. Panini's scalable check capture

solutions address the complete range of distributed check processing opportunities including teller capture, back-counter capture, remote deposit capture and remittance processing. The company provides solutions on a global basis, and has direct subsidiary operations in the United States covering North America and in Brazil covering Latin American markets.
